

Reference:MB Docket No.04-233. Our family and friends listen to K-LOVE radio station because it is a great way to get local and national news along with uplifting and encouraging music. If we didn't have that option there would be many more negative impacts in our community. It is in our public interest that we have this option of positive input since there is already so much negative and sometimes violent music and news that is communicated. Please keep this valuable station a priority.
